

ECondenserTM Model R

Ultra-Efficient Refrigerant Condenser

- > **You are NO LONGER hostage to environmental restraints with regard to how weather conditions affect the operating efficiency of your refrigeration system.**
- > **Can operate in nearly ANY LOCATION- interior or exterior- and can be programmed to provide virtually ANY non-freezing condensing temperature.**
- > **Requires virtually NO WATER for normal operating conditions.**
- > **Provides moderate thermal recovery by at least pre-heating water that will be heated further. Higher temperature refrigerants can be used for full water heating thermal reclaim.**
- > **60% or higher CO₂ and NO_x savings possible.**
