

# ECondenser™ Model W

## High-Efficiency Cooling Tower Alternative

- > **Cooling towers have always been functional, but their technology relies on "once-through" water evaporation, with significant water and chemical usage and costs.**
- > **CondeCooler provides ALL of the benefits of cooling towers but does it without the high water usage and operating costs.**
- > **Needs virtually NO FRESH WATER for normal operating conditions.**
- > **Can also "OUT PERFORM" cooling towers by providing much lower water temperatures for improved chiller efficiency.**
- > **Over 95% lower water usage and 35% or higher CO2 and NOx savings possible.**
